

Paul Wearmouth

At the age of just 2 Paul could hold a fully coherent conversation with other people and from then on he never stopped talking! Even in his School report one of Paul's teachers once made a comment saying 'Paul will rarely use one word where 10 will do!' From there it was only natural that he became a speaker and having a name like "Wearmouth" really did seal the deal!

Paul's light hearted, informative and energetic style challenges people to change their thought process from "I wish" to "I want" sparking the desire to take action. Speaking from experience Paul shares his techniques for liberating untapped potential and putting you in control of your own success. Having faced and overcome a lot of adversity in his own life, Paul has become an expert in mindset mastery to deal with the issues that stop us from getting to where we truly desire to be and to install belief in individual greatness.

Prior to speaking Paul worked in the retail industry from the age of 16 with some big names such as Tesco, Next and Signet in a multi million pound client relations environment. From this Paul has seen what does and doesn't work and where true potential of any business lies. His speeches centre around what experience has taught him - that if you want to be successful, you need to take ownership of it and make small changes to gain a big result.

Today Paul speaks to people and organisations who want to pull ahead of the competition and succeed in an increasingly competitive world. In turn Paul delivers an entertaining and powerful message of how to take control of your own success and create results from using your own natural skills. In any keynote or speech, Paul takes delegates on an electrifying journey of self discovery to show just what can be achieved when you take action to help bring your goals and dreams to life!

Paul's books "Sell Sell Sell" and "Wearmouth's Wisdoms" capture this message and everything he speaks about to further aid individuals to break free of the bonds that hold them back and allow them to surge forward and get to where they want to be.
